Abstract

I briefly present myself recalling the main steps in my career and ending with my last work done at CIDMA on the existence and uniqueness of solution for fractional differential equations with integral boundary conditions and the Adomian Decomposition Method.

This seminar was supported in part by the Portuguese Foundation for Science and Technology (FCT – Fundação para a Ciência e a Tecnologia), through CIDMA - Center for Research and Development in Mathematics and Applications, within project UIDB/04106/2020.
